

# Seamless Group Order

The Hassle-free Way to Order Food Online as a Group

Group Order enables a group of employees to choose their own meals from pre-selected restaurants. The meals are delivered at a time of your choosing, individually bagged and labeled, in four simple steps:

**1. Members of the Group Order receive an email invitation with restaurant selection**

**2. Each employee places order by designated time**

**3. Restaurants prepare food for time of delivery**

**4. Orders arrive by designated time, individually bagged and labeled.**

## Why is Group Order right for your Company?

### Save Money

- » Enforce budget and ordering rules to proactively manage employee spend
- » Cut wasteful spending associated with catering orders

### Save Time

- » Eliminate the task of coordinating daily lunch orders in person and over phone
- » Reduce the administrative hours of processing invoices and expense reports

### Provide Variety

- » Choose from hundreds of local restaurants across all cuisines
- » Accommodate a wide range of tastes and dietary restrictions with multiple restaurant selections

# Seamless Group Order

The Hassle-free Way to Order Food Online as a Group

## The Group Order Difference

### Without Seamless

Pass around menus and collect orders and money from employees

Call multiple restaurants for up to date menus and to place orders

Pass on preferred restaurants because of expensive delivery minimums

Sort through delivery to determine each person's order

Throw away catering leftovers at the end of the day on a regular basis

Sign for multiple deliveries each meal period and sometimes from same restaurant

Settle multiple house account invoices and sort through expense reports at the end of the month reimbursement, and credit card statements.

### With Seamless

Put the order control in the hands of employees with individual accounts and saved credit cards

Access current menus for hundreds of restaurants and let employees place individual orders online

Consolidate orders for each restaurant so minimums are easily met and split between employees

Receive each order individually bagged and labeled so no guessing is necessary

Reduce waste by only offering Group Order to employees in the office

Control the number of employees and streamline orders from each restaurant

Process single invoices from Seamless for all orders placed for the office

## What Our Clients are Saying:

"New hires love hearing they can order what they want, and they appreciate the flexibility and added menu options that Seamless provides us."
